

A cold fever early know A second temperature measurement Care for the baby

## Non-contact infrared forehead thermometer

**Fast Accurate**

*Rapid temperature Care for the baby*

## Can measure the human body, object, indoor temperature

MORE THAN JUST MEASURING TEMPERATURE

**Water temperature**

**Milk temperature**

**Food temperature**

**Room temperature**

/

# Mercury unexpected harm you

It is very important to choose a good thermometer

**The disadvantage of mercury**

# Measurement accuracy

ACCURATE MEASUREMENT IS THE STANDARD

## Baby thermometer features:

**Screen:** The large screen reading

**Fast:** 1 second rapid temperature

**Security:** Avoid cross infection

**Accurate:** Precise measurement

**Backlight:** Three color backlighting at night

# Three color backlighting

Child/adult body temperature gun

Normal body temperature  
32.0°C~37.5°C

Slight fever  
37.6°C~38.5°C

High body temperature  
38.6°C~42.9°C

# Product features

THE PRODUCT FEATURES

**01**  
**Rapid measurement**  
**Accurate error-free**

**A second rapid temperature measurement**  
**Infrared temperature measurement sensors**

**No need contact**

02

# Chip accurate

Automatic measurement. Accurate measurement

03

## Non-contact measurement

Don't need to contact, clean and health, avoid cross infection and fast measurement to solve the problem baby love moving

04

## Human body engineering

Human body engineering design,  
strengthen his hand grip handle experience,  
and be convenient to measure

# Three color optional

THREE COLOR OPTIONAL

# Product parameters

## PRODUCT PARAMETERS

|                       |  |                            |
|-----------------------|--|----------------------------|
| Range                 | Body                                   | 32°C~42.9°C,85.9°F~109.2°F |
|                       | Object                                 | 0°C~100°C,32°F~212°F       |
| Accuracy              | Body                                   | ±0.2°C/±0.4°F              |
|                       | Object                                 | ±1.0°C/±1.8°F              |
| Resolution            | 0.1°C/°F                               |                            |
| Working condition     | 10°C~35°C (50°F~95°F) RH≤85%           |                            |
| Storage condition     | -20°C~55°C (-4°F~131°F) RH≤93%         |                            |
| Power supply          | D.C. 3V 2pcs AAA Batteries             |                            |
| Power level indicator | Indication for low power level (<2.5V) |                            |
| Memory                | Automatic recall of 32 memories        |                            |
| Display               | LCD back-lit display                   |                            |
| Reading scale         | Celsius or Fahrenheit                  |                            |
| Automatic shut off    | In 18 seconds                          |                            |
| Measuring time        | 0.5 seconds                            |                            |

# Product analysis

PRODUCT ANALYSIS

## Product analysis

### Accurate probe

Accurate temperature measuring probe. Measurement accuracy. Little error

### Backlit display

Backlit design, temperature can also clearly see in the night for baby, and grandma and grandpa can see without glasses.

### PP material

Environmental protection PP material lets you use the product is safe and assured.

### One-click button

One-click boot measurement button
