A pink umbrella is shown from a low angle, looking up at the canopy. The black metal frame is visible, including the central shaft and several ribs. A dashed line connects a point on one of the ribs to a circular inset below. The inset shows a hand bending a black curved rod into a 180-degree loop.

I really like this umbrella. It is sturdy, it can be opened or closed with just a press. And more importantly, almost instant dry by just shaking.

One the metals/ribs broke after one day of use, with just light rain no wind. Very disappointing!
